

ASSESSMENT OF NATURAL PRODUCT Biocol (Gesavit)

I was very interested in the study on the anticancer effect of the product. The positive conclusion was that it inhibited the growth of human colon carcinoma HCT 116 line, which was statistically significant. I know that we (the Czech Republic) are in first place in terms of the incidence of colon carcinoma, breast and cervix cancer.

I have recommended Biocol (Gesavit) to 40 patients:

RESULTS:

18 patients with various digestive problems, such as heartburn, gastric hyperacidity, inflammation of pancreas, gall bladder and intestines.

Patients with inflammation used Gesavit 3x1 capsule. All of them were free of the problems and cured.

2 patients with intestinal carcinoma

Patients with intestinal carcinoma were postoperatively administered Gesavit 2x2 capsules in line with the conventional treatment.

1 patient with extensive liver carcinoma

Patient awaits operation so now on Gesavit 2x1 capsules.

6 patients with breast carcinoma

In six patients with breast carcinoma the results are more favourable. Two of them had a marked reduction of their tumour when using Gesavit 1x1 capsule. Both are due operations and treated with cytostatic drugs that they tolerate better.

1 patient with confirmed lung carcinoma (no conventional treatment)

Tumour disappeared after using Gesavit 4x1 capsules for 1 month. The patient has been monitored and continues with Gesavit 2x1 capsules.

1 patient with larynx carcinoma

This patient has received conventional treatment and Gesavit 2x1 capsules to complement it.

2 patients with prostate carcinoma

These two patients had a significant decline of PSA markers and they feel well.

1 patient with testicular carcinoma

The patient is after operation and on Gesavit 3x1 capsules. No metastases have been found in his abdominal cavity. The patient is healthy and takes no medication. He is under oncology review.

5 patients with precancerous cervix

The cases of precancerous cervix also demonstrate beneficial effect and healing.

3 patients with HP virus

They are undergoing laboratory testing.

CONCLUSION:

Gesavit is an important biological product free of side effects, which reduces multiplying cancerous cells and strengthens the body's self-defence in terms of increased production of T- lymphocytes. Gesavit is a very good complementary product for people with inflammations or cancer.
